Such 30 and 60 day requirement may be extended in writing by the City Manager. The notice shall also state that in the event the repairs or alterations are not made by the owner within the time limit stated, the City may repair or alter the sidewalk or driveway, and the cost and expenses of the repair or alteration will become a lien on the lot and premises of the owner.

B. The City Manager shall cause a certified copy of the notice to be served personally upon the owner of the property adjacent to the defective sidewalk or driveway, or the notice may be served by registered or certified mail, return receipt requested and returned. If, after diligent

B. The City's reasonable cost shall include a sum of not to exceed 15% for engineering and administration in connection with the alteration of repairs.

C. When the statement of cost of the repair or alteration has been prepared, a copy of the statement with a request for payment shall be mailed to the owner. This definition applies only to the extent of the City’s right, title, interest and authority to grant a license to occupy and use such areas for utility facilities.

C. "Permittee" means any person who proposes to encroach upon a right of way and has been issued a permit.

D. "Director" means Director of the Community Development Department or designee.

E. "Fee" means the issuance and encroachment fees established by City Council that are required prior to issuance of a permit.

Every person except as otherwise provided in this ordinance shall obtain a permit from the Community Development Department before:

A. Making or causing to be made any excavation or encroachment in any road, street, or City right of way;

B. Placing, constructing, or repairing any curb, gutter, sidewalk, driveway, pavement, base course, retaining wall, storm drain, culvert, pipe, conduit, cable, or other work of similar nature in, over, along, across, or through any street;

C. Placing or leaving any impediment to travel upon any street, including trash or debris. This does not include the placement of approved trash or recycling containers curbside on a regularly scheduled collection day;
D. Erecting or maintaining any post, pole, fence, guardrail, wall, loading platform, or any other structure on, over, under, or within a right-of-way;

C. All permit applications shall be accompanied by a written construction schedule, which shall include a deadline for completion of construction. The construction schedule is subject to approval by the Community Development Director or designee.

6.36.040 Blanket Permits

Blanket permit authorizations may be issued to any utility right of way licensee or franchisee as described in Chapter 4.18 of this code, or public utility, subject to the compliance with all applicable provisions of this ordinance. The issuance of a blanket permit authorization does not relieve the permittee from making such reports of activity as may be required and for paying for repairs and other costs incurred by the City due to the permittee's activity. Blanket permit authorizations shall be limited to utility service installations including bore pits not exceeding three feet in width and length, installed at a right angle to the centerline of the road, or an excavation not exceeding thirty square feet in area outside the existing street surface, curbs, gutters and sidewalks, or repairs to poles, work on overhead lines or work in existing manholes, and emergency repairs. 6.36.060 Plans and Specifications

All work shall be performed in accordance with the latest edition of the standard specifications for public works construction, including revisions or in accordance with the plans and specifications referred to in the permit, in addition to any special requirements and/or specifications which are made a part of the permit. In case of conflict between two specifications the higher specifications shall apply. No changes may be made in the location, dimensions, character, or duration of the encroachment, or use as granted by the permit except on authorization by the Director or designee.

6.36.070 Notice of Construction

Except in the case of an emergency, the permittee shall notify the City Engineer not less than two (2) working days in advance of any excavation or construction in the public rights of way.

Subject to the notice requirements in Section 4.18.270, all work which does not comply with the permit, the approved or corrected plans and specifications for the work, or the requirements of this ordinance, shall be removed at the sole expense of the permittee. The City is authorized to issue a stop work order to assure compliance with the provision of this ordinance.

6.36.090 Completion of Construction

The permittee shall promptly complete all construction activities so as to minimize disruption of the City rights of way and other public and private property. All construction work within City rights of way, including restoration, must be completed within 90 days of the date of issuance of the encroachment permit unless an extension or an alternate schedule has been approved by the Community Development Director or designee.

Where excavation occurs within areas already paved, a temporary paving shall be installed the same day the excavation is backfilled or the excavation shall be temporarily steel plated with the prior consent of the Director. When replacing permanent pavement, the thickness shall be one inch greater than that of the surrounding pavement or surface. The base course removed shall be replaced to a minimum of 12-inch thickness. When the street surface has been treated with a seal and/or slurry, the surface shall be replaced with 3-inch minimum of asphalt concrete.

B. If weather or other conditions do not permit the complete restoration required by this Section, the permittee shall temporarily restore the affected rights of way or property. Such temporary restoration shall be at the permittee's sole expense and the permittee shall promptly undertake and complete the required permanent restoration when the weather or other conditions no longer prevent such permanent restoration. Any corresponding modification to the construction schedule may be subject to approval by the City.

C. If the permittee fails to restore rights of way or property to good order and condition, the City shall give the permittee written notice and provide the permittee a reasonable period of time not exceeding thirty (30) days to restore the rights of way or property. If, after said notice, the permittee fails to restore the rights of way or property to as good a condition as existed before the work was undertaken, the City shall cause such restoration to be made at the expense of the permittee.

The warranty shall be in effect for a period of two years following the date of final inspection. The Community Development Director shall provide written notice to the applicant of the need to provide warranty work unless the Director determines that an emergency exists, that delay would cause serious additional loss or damage, or if any delay in performing the work might cause injury to any member of the public. In cases of emergency or if the applicant, after written notice, fails within fourteen days to perform the work required, the City may perform the warranty work and recover the costs of the warranty work, including any additional damages suffered by the City, from the permittee. The Director may require an additional two year warranty for any repairs done pursuant to the warranty obligation described above.

There shall be appended to such petition and as a part thereof and as a basis for granting the same, the consent of the owners of not less than three-quarters of the property adjoining or abutting the portion of such street or alley which is proposed to be vacated. The consent of the owners shall include all owners as defined in Section 6.44.010 and the signature of said owners shall be in writing and duly acknowledged before an officer authorized to take acknowledgments of deeds. (Ord. 4149 §2, 1977)

6.44.030 Filing of Petition
