

CITY OF GRANTS PASS, OREGON CLASS SPECIFICATION

Water Treatment Plant Specialist II

FLSA Status : Non-Exempt
Bargaining Unit : TE7
Salary Grade : Teamsters

CLASS SUMMARY:

The Treatment Plant Specialist II is the fifth level in a seven level Utilities Operation Series. Incumbents are responsible for performing daily operations and semi-skilled to skilled maintenance of the water treatment plant, lift stations, and/or pump stations. Duties may include preventative maintenance, facilities and equipment repair, construction, sampling and analyzing processes to determine regulatory compliance, making process adjustments, completing and compiling computer based data and files, interpreting regulations, performing customer service activities with vendors and contractors, and fabrication. Incumbents create, update and maintain maintenance records, solicit bids, and order parts and supplies. Some incumbents inspect pump station and reservoir sites. Incumbents are required to operate hand and power tools and light equipment. Incumbents provide training and guidance to Treatment Plant Specialist I, seasonal and temporary workers.

The Treatment Plant Specialist II is distinguished from the Treatment Plant Specialist I by its focus on semi-skilled to skilled maintenance and mid-level certification.

CORE COMPETENCIES:

- ***Integrity/Accountability:*** Conducts oneself in a manner that is ethical, trustworthy and professional; demonstrates transparency with honest, responsive communication; behaves in a manner that supports the needs of Council, the citizens and co-workers; and conducts oneself in manner that supports the vision and goals of the organization taking pride in being engaged in the community.
 - ***Vision:*** Actively seeks to discover and create ways of doing things better using resources and skills in an imaginative and innovative manner; encourages others to find solutions and contributes, regardless of responsibilities, to achieve a common goal; and listens and is receptive to different ideas and opinions while solving problems.
 - ***Leadership/United:*** Focuses on outstanding results of the betterment of the individual, the organization and the community; consistently seeks opportunities for coordination and collaboration, working together as a team; displays an ability to adjust as needed to accomplish the common goal and offers praise when a job is done well.
-

ESSENTIAL CLASS DUTIES: These duties are a representative sample; position assignments may vary.

- Monitors and operates the Water Filtration plant, utilizing the SCADA system to monitor levels, temperatures, turbidities and flow rates to determine process performance and effectuate changes necessary to maintain required standards. Starts and stops water treatment plant equipment and processes as needed.

- Performs laboratory analysis of raw, mixed and finished water samples to determine process effectiveness, which includes preparing reagents, weighing samples, performing calculations, and recording and gathering data.
- Collects hourly operations data, compiles and processes data, prepares daily and monthly reports.
- Instructs and assists subordinate staff in the proper methods and techniques to carry out their duties in accordance with adopted policies, standard operating procedures and State and Federal Regulation.
- Performs routine inspections and preventative maintenance, and calibration and repair of plant operational systems, replaces and installs pipes, cables, conduits and equipment to maintain or improve the facility. Inspects and replaces oils, fluids, and parts. Maintains accurate equipment maintenance records.
- Researches and orders parts and supplies used in operation, repair and maintenance of plant processes and equipment.
- Inspects reservoir and pump station facilities to evaluate security issues and recommend and/or effectuate changes.
- Inspects and operates facility equipment, emergency generators, reservoir and pump station facilities, booster station pumps and control valves to evaluate proper operation and maintenance needs.
- Performs and/or assists in the processing of plant solids both at the plant and pond sites, to include cleaning of tanks and basins. Evaluates the effectiveness of polymer dosing and dredging performance to insure optimum equipment operation.
- Enters data into the equipment database regarding equipment operation, identifies abnormal conditions or situations, and initiates corrective action.
- Determines chlorine mix, concentration and speed of delivery at remote sites based on observed and historical residual data and inspects and repairs metering pumps.
- Works with vendors and contractors via email and telephone in a professional manner.
- Communicates verbally and in writing with the Superintendent and co-workers regarding plant operations, repair needs, equipment needs, process modifications, and expected demands based on trends.
- Responds to after-hour emergencies.
- Safely operates a motor vehicle, heavy equipment and forklift.
